I build impactful digital products by combining engineering and design. I thrive when working with users, shaping their experience and building ideas directly into the codebase. I specialize in rapid prototyping and building in React.

Soft skills

Founder, team player, project ownership, design thinking, loyal and hands-on

Development

React, Typescript, NextJS, GCP

Design & prototyping tools

Figma, VO.dev, Cursor, Opencode

3D modelling

Blender, Solidworks, Unity3D

Languages

Dutch (native)
English (fluent, speaking, reading, writing, C2)
Italian (intermediate, speaking, reading, A2/B1)
French, German, Spanish (minimal, A1)

Personal interests

Cultural enthusiast, traveller, amateur cook, writer, history geek and nerd

Experience

Founder, Leapfrog

2023 - ongoing

Rotterdam

Founded and built Leapfrog, an AI-first user research synthesis tool (380 MAU) that **reduces time-to-insight by 80%**, enabling research teams to accelerate decision-making.

Product designer at coeo incasso

2022 - ongoing, freelance

Rotterdam

Led design across **digital and non-digital consumer touch-points**. Projects include **payment flows, credit portal** and the full **marketing platform**. Drove **end-to-end product ownership** in close collaboration with C-level stakeholders. Pioneered **AI-driven and RCS-based communication concepts**, shaping next-gen customer communication.

Product designer at Chemistry team

2023-2024, freelance

EMEA & Singapore (90% Remote)

Executed design research and product design projects across **healthcare, public sector**, and **enterprise** contexts in EMEA. Conducted **user research, service design**, and **UX design** for healthcare data platforms and provider tools. Developed and delivered **design training programs** enabling clients to adopt design-driven workflows.

Design engineer at Aerlabs

2019, internship

Delft

Developed an interactive Mapbox-based dashboard for real-time aerospace sensor data, enabling engineers to visualize and analyze noise patterns across multiple locations.

Education

MSc. Design for Interaction & MSc. Strategic product design

2020-2022

Delft University of Technology

Specialisation in UXR, design methodology and digital design.

Courses on prototyping, smart products and machine learning.

BSc. Industrial design engineering

2015-2019

Delft University of Technology

Specialisation in industrial design and software design

Courses on entrepreneurship and software development.

Publications

Human-Centered AI: An Illustrated Scientific Quest

2025

Springer publication

This publication was an initiative from SAP. I was invited to write a chapter for their publication on the implications of AI on user research with co-writer Shilpa Tripathi

An inclusive revision of the debt trajectory

2022

Delft University of Technology

In collaboration with coeo, my thesis to use accessibility design to create a more inclusive debt trajectory for vulnerable groups by offering alternative user experiences. These were later pioneered by me internally as part of a long-term strategy
